

Mattress Cleaning System

Hygienic NON-CHEMICAL anti-mite solution

An average person loses around 1.5 grams of dry skin each night, which in turn settle deep inside the mattress. Dust mites feed on these flakes, and as a result produce a corresponding amount of excrement. Scientific evidence suggests that this excrement is a major cause for allergies such as asthma, respiratory problems and eye infection to name a few.

Remove the cause of allergies and asthma from your home!

Today you have the world's best non-chemical and truly safe hygiene solution at your disposal - The UV-C electromagnetic radiation technology that uses safe, dry cleaning methods. This superb technology is designed to penetrate deep inside the mattresses where mites thrive, and effectively exterminate up to 99.9% of dust mite population, with just the one cleaning application!

The high frequency vibrations of an electronically controlled vacuum machine and UV-C light systematically destroys the genetic structure of micro organism, making them losing their ability to further reproduce, while simultaneously disinfecting the mattress surface, leaving it fresh and smelling clean.

Clean It Bed and Fresh

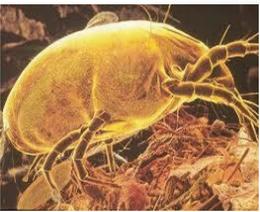

Clean It Bed & Fresh is a ready to use solution which neutralize allergens produced by dust mites in mattress, pillows and beddings.
